

# Design and Analysis of Algorithms – UE17CS251

CLASS 1

# What is an algorithm?

An algorithm is a **sequence of instructions to accomplish a task**

# COURSE INFORMATION

# Why study algorithms?

#1

A student of Computer Science should know a standard set of algorithms from different areas of computing.

#2

Algorithmics is the core and cornerstone of Computer Science.

# Why study algorithms?

**#3**

A student should know how to design new algorithms and analyse their efficiency.

**#4**

Provides a novel lens on domains outside Computer Science as well.

**#5**

Algorithmics will challenge you. It is fun ☺

*The most valuable acquisitions in a scientific or technical education are the general purpose mental tools which remain serviceable for a lifetime.*

*~ George Forsythe*

STANFORD

# History of Algorithms

## Father of Algorithms

**Abu Abdullah Muhammad  
ibn Musa Al-Khwarizmi (c. 850 AD).**

Persian Astronomer and Mathematician

# History of Algorithms

- ▶ Al – Khwarizmi introduced the decimal positioning within numeric systems to the western world.
- ▶ In its original form, algorithms known as algorism was regarded as rules for computing calculations and performing arithmetic with Hindu-Arabic numerals.

# Design and Analysis of Algorithms
